SKILLS

• Programming

HTML
CSS
JS (React, Next, Vue, Nuxt)
Wordpress

• Language

Japanese (N3)
English (Intermediate)

• Others

3D Blender (Basic)
Three.js (Basic)
UI/UX (Intermediate)

CERTIFICATIONS

- N4 (NAT-TEST)
- ITPEC (FE)
- Diploma in
System Creator
(Metro General
Business College)

OBJECTIVE

My strengths are my ability to learn quickly and focus deeply when exploring new technologies. I also have strong communication skills.

One of my weaknesses is that I tend to try doing everything myself, as I'm interested in many things. I sometimes run out of time, but I prioritize what's important and learn about other topics when I can.

I studied IT at Metro General Business College, where I learned IT strategy, networking, web design, and Java. I also passed the IP and FE exams. After graduating, I joined ShinGenki Development Co., Ltd. as a new graduate, where I learned project development workflows, Git usage, and best practices for writing high-quality code.

Currently, I develop front-end projects using React and Vue. In my free time, I also study 3D technologies and UI/UX. I created a basic 3D website here: <https://3d.sattpaing.dev>. In the future, I want to keep learning and eventually manage projects as a bridge engineer, leading teams using a QA agile waterfall approach.

EDUCATION

2009/6

- No. 2, Basic Education High School, Kamayut Township, Yangon City

2015/6

2015/11

- Dagon University, History Major
(distance learning) enrollment
